

## Reading Worksheet – News Articles

Read each article carefully. Then answer the True / False questions.

### Article 1: New Community Park Opens for the Public

A new community park was opened in the city this week to give people a place to relax and enjoy nature. The park is located near a busy road but has many trees and green spaces inside. There are walking paths, benches, and a large play area for children.

During the opening ceremony, city officials spoke about the importance of open spaces for health and happiness. Many families visited the park on the first day. Children played on swings and slides while parents walked or sat and talked.

The park also has dustbins to keep the area clean and security staff to ensure safety. The city government said more parks will be developed in other areas in the future.

True / False:

1. The park is far away from the city.
2. The park has a play area for children.
3. Security staff are present in the park.
4. The city plans to build more parks.

### Article 2: School Holds Science and Activity Fair

A local school organised a science and activity fair for students last Friday. Students from different classes prepared small projects using charts, pictures, and models. The projects were based on topics like plants, water saving, and the solar system.

Teachers guided students during preparation. Parents and visitors came to see the projects and asked students questions. Many students explained their work confidently and clearly.

The school principal said such fairs help students learn by doing and improve communication skills. The school plans to organise similar fairs every year.

True / False:

1. Students prepared projects using charts and models.
2. Parents were not allowed to attend the fair.
3. Teachers helped students prepare the projects.

4. The school plans to organise similar fairs again.

### **Article 3: Students Help in Cleanliness Drive**

The city sanitation department organised a cleanliness drive on Sunday morning. School students joined the activity along with teachers and city workers. They cleaned roads, footpaths, and nearby public places.

Students wore gloves and collected waste in bags. City officials explained how plastic waste harms the environment. Many local residents joined the activity after seeing the students work.

After cleaning, students planted small saplings near the roadside. The sanitation department thanked the students for their support.

True / False:

1. Only city workers participated in the cleanliness drive.
2. Students learned about plastic waste during the activity.
3. Saplings were planted after cleaning.
4. The sanitation department appreciated the students.

### **Article 4: Government School Opens Reading Corner**

A government school opened a new reading corner for students this month. The reading corner has shelves filled with storybooks, picture books, and simple information books. Students can read during free periods and after school hours.

The school arranged cushions and small tables to make reading comfortable. Teachers encourage students to read silently or discuss stories with friends.

Parents said the reading corner helps children improve vocabulary and imagination. Teachers plan to add more books and conduct regular reading sessions.

True / False:

1. The reading corner has only textbooks.
2. Students can read after school hours.
3. The school made the reading area comfortable.
4. Teachers plan to conduct reading sessions.

## Article 5: City Starts Safe Cycling Program for Children

The city traffic department started a safe cycling program for school children. Traffic police taught students how to ride bicycles safely on roads. They explained the importance of wearing helmets and following traffic signals.

Students practiced cycling in a safe area under supervision. Parents and teachers also attended the program. Officials said the program helps reduce accidents and promotes healthy habits.

The traffic department plans to visit more schools and conduct similar programs across the city.

True / False:

1. The program teaches children safe cycling rules.
2. Students rode bicycles without supervision.
3. Traffic police explained the use of helmets.
4. The program will be conducted in more schools.
